Pentair Jung Pumpen at IFH/Intherm in Nuremberg

Experience the latest innovations in wastewater technology in action

Pentair Jung Pumpen is delighted to present several new products at IFH/Intherm in Nuremberg, which can be seen in action right at the stand. The company is expanding its successful Easyfix series with the new Easyfix 50 installation kits for easy installation of drainage pumps with 2-inch or 1½-inch pressure outlets. They will be demonstrated live together with the Easyfix 32 kits.

Jung Pumpen is also expanding its product range in the field of commercial wastewater disposal. The focus here is on new solutions for applications in the restaurant and hotel business, which will be presented for the first time at IFH.

Another new product is a heatable backflow loop in an outdoor cabinet for DIN-compliant backflow protection outside buildings. There will also be a preview of future IoT-enabled controls for pumping stations, lifting stations and pressure drainage systems. The access options via an associated app will be illustrated on a monitor presentation.

Entertainment will also be provided: a wheel of fortune promises the chance to win attractive prizes. As usual, the cocktail bar at the stand invites visitors to engage in conversation and enjoy vitamin-rich mixed drinks. There are many good reasons to visit the IFH stand 5.408 in Hall 5.
